- Implementation of all business and human and asset management plans
- Ensure the day to day management of the operations including staffing issues if required
- Meet all financial, environmental and company policies
- Professional and capable in all aspects of running a agricultural enterprise to deliver results demanded of a corporate board level

Authority Levels:

- Supervision of staff will be determined by the assigned project once finalised

Innovation-

- Ensuring the delivery of results while undertaking latest technology to ensure that sustainable and environmental agricultural practises are utilised

People-

- Liaise and build sound professional relationships with staff, clients and key stakeholders

Selection Criteria:

- Minimum undergraduate degree in agricultural science or equivalent - subject to countries visa requirements
- At least 5 years practical experience working in the agricultural industry with proven track record at management level and with proven results
- Previous practical experience working in an agricultural enterprise with development and implementation of business plans is advantageous
- High standard of written, verbal and computer communication skills
- Working in Middle East, Northern Africa or Arid countries is an advantage but not necessary
